Pune: 3 A. Rachna Avenue, FC Road, Dehan Gymkhana, Pune-411004. Phone: 9552524949

'Aniguard-O' is a high quality organic powder that resolves ectoparasites on animals. Which is 100% natural, safe and non-toxic. This natural fine powder is prepared from the powder of the hard outer shell of fossils.

Why use Anyguard-O? And the benefits of 'Anigard-O'

Further, to prevent health damage to animals and financial loss to the producer due to baha parasites like Dilpa, 'Aniguard-O' should be used.

Effects of ectoparasites on animals

 Weight loss	 Hair loss and dandruff	 Lack of blood and deficiency
 Itching, burning and swelling	 Deficiency and lack	 Weak immunity

Economic loss to producer due to baha-parasites

	One liter per animal per day even for moderate infestations
	Parasites put animals at increased risk of secondary diseases and other health problems. Parasites pose a significant problem when animals are sick/supplementary for parasites

Benefits of 'Aniguard-O'

 Parasites are killed mechanically. Due to which they cannot develop their immunity.	 Parasites put animals at increased risk of secondary diseases and other health problems.
 Eliminates a wide range of external parasites such as ticks, fleas, lice, worms.	 When animals are sick / supplements for parasites
	 Economic due to invisible damages It is effective in preventing damage and preventing loss of milk yield.

Benefits of 'Aniguard-O' 100% natural, non-toxic and organic properties

	It has no side effect on animals
	It does not require a separate person to monitor the animals even after use.
	Milk extracted during this period can be passed.

'Aniguard-O' can be used in 2 ways:

1 By spraying to prevent parasite infestation in the cowshed

-  **Mix 'Anigard-O' powder with water Make a mixture of it.**
-  **Then take the spray pump to the entire cowshed and Spray it on animals.**
-  **Spraying after 15 days to prevent infestation of parasites**

2 By spraying to prevent parasite infestation in the cowshed

-  **Mix 'Anigard-O' powder with water Make it thick paste.(The paste should not be too thin).**
-  **Wet the affected part of the sitting animal**
-  **Then the paste is gently applied to the affected area of the animal wearing gloves.**
-  **तीन दिवस** **Applied to animals leave the paste for 3 days.**
-  **After 3 days 5 inoculate the animal**

How does 'Aniguard-O' work?

Most bats have a waxy sheath covering their body

Microscopic sharp particles in the powder of 'Anigard-O'; Insects/parasites come in contact with them and pierce their protective outer shell.

So soon the water in the parasite disappears.

Parasites dry up and die. (Larvae are similarly affected.)

Thus, the mode of action of 'Anigard-O' for the control of insects and parasites is mechanistic in nature. which does not cause mechanical/chemical damage to animal cells. This makes 'Anigard O' an excellent and completely natural parasite controller.
